Tweet us @ezuce

Lately, we at eZuce have been working overtime to get a new project off the ground. We are thrilled to announce that it is complete and absolutely worth all the painstaking deliberation over message, layout, aesthetic, design...

If you visited our site a few weeks ago, you already know that it was, to put it nicely, less than spectacular. After all, a groundbreaking communications company at the forefront of open source development should have a spectacular website. Thankfully, our design experts have been hard at work and our new site is now live at ezuce.com.

Since our philosophy is based on empowering others with the freedom to take their IT infrastructure into their own hands, we consider all our projects to be a collaborative effort between our engineers and our customers. This being the case, we take your opinion seriously and are eager to get your feedback. If you would like to share your thoughts on the new site or eZuce in general, you can respond to this email or tweet @ezuce.

To celebrate the launch of our new website, we are offering 10% off any new service contract, or free seat licenses with the purchase of a 12-month service contract for any installation over 50 seats. For more information, email info@ezuce.com. If you have any questions about our product, or our website, drop us a line! We hope to become your provider of choice for all your Unified Communications infrastructure.
